QING is a professional gimbal for DSLR/mirrorless camera. It is compatible with popular DSLR camera on the market. It is available to install on the tripod or other carrier to extend its shooting function.

It has a oversized touch screen on remote control, allows users to switch work modes, control rotating direction and set up parameters on it directly and visibly. Users can also control camera's follow focus and zooming after connecting camera to QING via cable.

**Suggestion**

Feiyu Qing includes below information, please read the information before using the gimbal:
1. Quick start guide
2. Online instruction
3. Tutorial
The tutorial videos can be watched at FeiyuTech official website [https://www.feiyu-tech.com/play/](https://www.feiyu-tech.com/play/) or scan the QR code.
1. Overview

* The product is NOT included the camera.
Remote Control

Short Press in other pages: Return to home page

Accessories

USB 2.0 to Micro (A01) × 1
USB 3.0 to Micro 3.0 (A02) × 1
USB 2.0 to Mini (B01) × 1
USB 2.0 to Type-C (C01) × 1
Type-C to Multi (Sony Shutter Cable) × 1
DC 2.5mm(Panasonic Shutter Cable) × 1
Dedicated Battery × 1
Tripod × 1
Quick Release Plate × 1
Arca Quick Release Plate × 1
2. Start to Use

⚠️ TIPS
· Please install the camera and balance it before power on the gimbal.
· Please do not touch tilt motor and gears to avoid gripping.
· When the battery is low, please charge the battery.
· When not in use, power off the gimbal and then remove the batteries.

2.1 Charging

⚠️ Please fully charge the dedicated battery before power on the gimbal for the first time.
Please choose the suitable charger when quickly charging.

2.1.1 Charging for the Gimbal

Using USB 2.0 to Type-C cable to charge the dedicated battery, support 5V/3A input.

Battery Indicator: All the 3 indicators turn on when battery is full

Function Indicator:
quickly flashing: Low battery and please charge in time
slowly flashing: Pan mode
constant on: Lock mode
2.1.2 Charging for the Remote Control

Using USB 2.0 to Micro cable to charge the remote control, support 5V/3A input.

2.2 Unlock/Lock

There is a position lock on the tilt axis, which is convenient for locking the position, installation, storage.

⚠️ Unlock the gimbal before powering on it.

2.3 Battery Installation

⚠️ Please fully charge the dedicated battery before power on the gimbal for the first time.

Install the battery: Push the battery in along the slot ①, and after that, the battery lock ② will rebound to prevent battery from falling.

Remove the battery: Unlock the battery lock ② and pull the battery out.
2.4 Camera Installation and Balance

⚠️ TIPS
- Make sure the battery and memory card are loaded before camera installation.
- Before balancing the gimbal, the lens cover should be removed from the camera and the memory card needs to be inserted to the camera to complete all the cable connections to ensure that the camera is ready for shooting.
- During balancing the gimbal, make sure the camera is power off and the gimbal is turned off.
- If add accessories after the balance is completed, please re-balance.

In order to get ideal shooting, please balance the gimbal before using. And the gimbal with perfect balance will have longer battery life.

Step 1: Keep the gimbal horizontal as the figure shows, then lock the position lock ①.
Step 2: Mount camera on ARCA quick release plate ②, and tighten it.

Step 3: Install the ARCA quick release plate on the quick release plate, and tighten the ARCA quick release plate safety lock ③. Install the lens holder ④ and tighten the thumb screw ⑤ to hold the lens firmly.

Step 4: Unlock the position lock ①, and loose the thumb screw ⑥. Slide the slide arm ⑦ to balance, and tighten the thumb screw ⑥ after the balancing is completed.

If the camera can stay stable after moving your hand away, which means balanced.
2.5 Power On/Off

⚠️ Please release the tilt motor lock before powering on.
Please do not touch tilt motor and gears to avoid gripping.

Steps:

(1) Gimbal:
Install the dedicated battery and long press the power button of dedicated battery and release it when the battery indicator and function indicator turn on together and hear the tone. Long press again to power off.

(2) Remote Control:
Long press the power button of remote control, release it when the touch screen shows ✋.
Long press again to power off.
3. Function & Operation

3.1 Function/Modes Introduction

① Pan Mode (Default mode)
When attached on the other equipment, the tilt direction is fixed, and the camera direction moves according to the rotation of the equipment.

② Lock Mode
When attached on the other equipment, the tilt direction is fixed, the camera direction doesn’t move while rotating the equipment.

③ Reset
Reset to Pan mode, tilt and pan axis reset to initial position.
Time-lapse photography
User can set the start and stop shooting route on remote control, QING will auto rotate according the setting. **Refer to P17 3.4.1.**

**TIPS:**

a. After click "Start" under time-lapse mode, gimbal will record all the movements before it stop. Do not repeat unnecessary actions during time-lapse.

b. The parameter a/b fps indicates how long the video will be play under the condition you set below. (Total duration and numbers of photos are automatically calculated by the gimbal without setting).

c. Please set the parameter for pan/tilt/interval/stop time. Interval time means the time that between two shooting. Stop time means the exposure time while taking photos.

Fast rotate
The rotating speed/interval time/stop time can be set. QING will rotate according to the setting parameter. No need to frequently manually set up during shooting. **Refer to P18 3.4.2.**
⑥ Wide Angle
For grand scenes or special scenes, the gimbal supports wide angle shooting (9 square panorama) can be assembled into 1 picture later on computer or Feiyu ON App. Refer to P19 3.4.3.

⑦ Pan Shoot
Gimbal will rotate precisely (pan rotate 180° or 360° for panorama) and take pictures according to the setting. Refer to P19 3.4.4.

To get more videography skills with gimbal and its tutorial, please kindly visit our official of Remote Control or download Feiyu ON App. http://www.feiyu-tech.com
3.2 Function Operation of Remote Control

3.2.1 Power Button of Remote Control Operation

3.3.2 Display Screen Switching

Switch screen by sliding left and right.

3.3.3 Touch Screen Common Gesture Operation
Slide to left: Switch to left screen
Slide to right: Switch to right screen/back to previous page
Click: Check this option

3.3.4 Lock and Unlock

3.4 Modes Setting

Slide right to left
Slide left to right
Tap to select current menu

3.4.1 Time-lapse Photography Mode

(1) Slide to right to enter reverse screen, click to enter the time-lapse photography interface, the interface has three options (time setting, path setting, last configuration).
(2) For the first time, please set up all the time parameters at Time Set menu, including movements time on pan, tilt axis, interval time and stop time for long exposure of photography.

(3) Enter Rotate Set menu, use the knob and the turntable to control the path of lens, record start and end points of path.

(4) Click Start to go to auto timelapse photography, the gimbal will show up remaining time, current and total number of photos. Please wait for completion by itself.

3.4.2 Fast Rotation Mode

(1) Slide to right to enter reverse screen, tag to enter the automatic rotation mode.

(2) Adjust by the turntable:
   ① select the gear position of speed (There are 30 gears from 1 to 30, the gear position is indicated by "X", the higher the gear speed is, the faster the speed
   ② Set interval time/stop time (How often to take a photo and how long to exposure for each photo).
(3) Tag direction icon Ọ or Ọ, to start to rotate, tag again to stop. Once got settings set up, simply tag the trigger button to re-control the pan/tilt via turntable and knob.

3.4.3 Wide Angle

Slide to right to enter reverse screen, tag to enter the Wide Angle interface, as the picture shows:

Once setting done, simply tag the trigger button to re-control the pan/tilt via turntable and knob.

3.4.4 Pan Shoot

Slide to right to enter reverse screen, tag to enter the pan shoot interface, and have 180° panorama and 360° panorama. Tag to enter, set the number of photos and seconds to stay, tag "Start". As the picture shows:

Once setting done, simply tag the trigger button to re-control the pan/tilt via turntable and knob.
3.4.5 Sensitivity Setting

Once setting done, simply tag the trigger button to re-control the pan/tilt via turntable and knob.

3.4.6 Control Object Setting

Use the touch screen to switch. Refer to P15 3.2.6.

Control the gimbal  Zoom  Follow focus  Control the non-brush follow focus

3.4.7 Motor Power Setting

Scroll the left knob to select auto/customize, and scroll the turntable under the display to adjust the custom force.

After setting, just click the trigger button to make the knob and turntable control the gimbal again.
3.4.8 Gimbal Calibration Setting

On successful calibration

On failed calibration

3.4.9 Remote Matching Settings

3.4.10 Language Settings

3.4.11 About the Gimbal

Introduction about the firmware version of the device.

3.5 Gimbal Initialization

You can initialize your gimbal when:
- a. When camera is not level.
- b. If not use for a long period of time.
- c. In case of extreme temperature variations.
Gimbal calibration step:
(1) put the gimbal on the horizontal table.
(2) Select "gimbal calibration" on the remote control (Refer to P21 3.4.8). During the calibration, the tilt will sag gently.
(3) After the calibration is successful, the gimbal will be gently raised to the horizontal state.

4. Accessories

4.1 Brushless Follow Focus (AKF II)

① Fix the lens gear to the camera’s focus ring position.
② Fasten the fixed bracket to the quick release plate of the gimbal with a hexagonal screw, and insert the aluminum tube (if the lens holder is attached to the gimbal, remove it).
③ Insert the follower into the aluminum tube, move the aluminum tube to adjust the front and rear position so as to make the follower gear and the lens gear engage, and lock the fixed thumb screw on the fixed bracket.
④ Connect the USB cable to the USB port as the picture shown, the installation is completed.

For more instructions, please check AKF2 AK series brushless follow focus manual.
4.2 Wireless MIC Kit

The receiver transmitter can collect the sound from the transmitter within 20m range.

4.2.1 How to Use

(1) Manually set video mode on camera.

(2) Plug in the wireless microphone (receiver terminal) to camera MIC jack. Turn it on.

(3) Turn on the wireless microphone (transmitter terminal), it is available to use. (To get a better effectiveness, please wear it as close to the sound source as possible.)
(4) Plug the wireless clip-on microphone in the wireless microphone (transmitter terminal) mount.

4.2.2 Wireless microphone kit is available to use individually.

4.2.3 The indicator description of wireless microphone kit

* Workable for both receiver and transmitter terminal.
