1. Product Overview

* The showing sports camera is not included in the package
2. Quick Start Guide

1. Install Battery

Please fully charge the battery before power on the gimbal for the first time.

Remove the bottom cap, insert a 26650 battery and then tighten the cap.

2. Put the camera on

Please mount the camera before power on the gimbal. When not in use, turn off the gimbal and then remove the camera.

Take the GoPro HERO 5 camera for example.

Put the camera on mounting plate, then tighten the camera with retainer bar and screw.

To work with RX0 camera, please change RX0 camera adapter kit.

* RX0 camera adapter kit is optional.

Replacement steps

1. Loose and take down the original fixed plate of the gimbal
2. Install RX0 adapter plate and tighten the screw ① ②
3. Insert the set screw ③ of the camera from the bottom of RX0 adapter plate
4. Place the camera and tighten the set screw
3 Balance the Gimbal (Before power on)

If camera tilts to the left, loosen the knob ring, pull cross arm out to the right until camera is horizontal.

If camera tilts to the right, loosen the knob ring, push cross arm in to the left until camera is horizontal.

4 Power on / off

Power on / off: Long press the function button, the display will show 
and release it when you hear the beep tone.
3. Charging

Charging for Gimbal

Charging with Micro USB cable

Charging for Camera

Connect the camera with the gimbal via charging cable, the camera can be charged when gimbal is powered on.

### Shutter Button Operation

After connecting the gimbal to camera ✖️ via Feiyu On App, single tap the button can control the camera for shooting.
The G6 gimbal can easily create constant speed movements in the auto-rotation mode. This mode can be used for recording both regular video and motion timelapse photography. For better performance, attach gimbal to the FeiyuTech tripod, or other tripod, to keep it completely still.

Set rotation speed in Feiyu ON App
Connect to the Feiyu ON App and select desired speed from the auto-rotation mode rate option in the settings menu.

<table>
<thead>
<tr>
<th>G6 Rotation Speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>12s/turn</td>
</tr>
</tbody>
</table>

Note: Both the pan and tilt directions can be rotated.
(1) Enter auto-rotation mode
Enter auto-rotation mode by quadruple tapping the function button.

(2) Set rotation start position
Record the first position (rotation start position) by manually moving camera to desired position. Hold in position for half a second. Single tap the function button to record rotation start position.

(3) Set rotation end position
Record the second position (rotation end position) by manually moving camera to desired position. Hold in position for half a second. Single tap the function button to record rotation end position.

(4) Start auto rotation movements
The gimbal automatically restores to the start position, while the tilt axis and pan axis start rotating at a constant speed according to pre-set speed to end position, repeat step (2) (3) to start again.

Exit → Double tap Trigger button → Exit the auto-rotation mode and reset
5. Download and connect App

1. Download and install “Feiyu ON” App

Please download Feiyu ON at your smartphone app store or scan the QR code below.

* Requires iOS 9.0 or later, Android 6.0 or later.

![QR Code for iOS](image1)

![QR Code for Android](image2)

2. Connecting App

Turn on the Bluetooth and run the App on smartphone, follow on the instructions to connect smartphone to gimbal via bluetooth.
6. Connecting to Camera

G6 gimbal can connect to the camera by Feiyu ON App.

Operations available after connecting to the camera:

<table>
<thead>
<tr>
<th>Button</th>
<th>Operation</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Setting Button</td>
<td>Single tap</td>
<td>Single tap in the main interface of the gimbal display can switch to the camera modes</td>
</tr>
<tr>
<td>Shutter Button</td>
<td>Single tap</td>
<td>On the main interface of the gimbal display, single tap for shooting / start shooting / stop shooting</td>
</tr>
</tbody>
</table>

Steps of connecting to camera:

1. Turn on your sports camera's WiFi (2.4GHz)
2. Successively select "Settings" -- "Parameters Settings" -- "WiFi Settings" on Feiyu ON App
3. Select camera model
4. Select your camera connection name and enter the correct connection password of your camera
5. Waiting for connecting
6. Connect successfully

If icon 📌 appears on the display screen, it means the gimbal failed to connect to the camera, try to restart gimbal or camera, or reconnect according to above steps
If the WiFi is not connected for a long time, please restart the camera's WiFi.

7. Firmware Upgrade

Upgrade the firmware through the Feiyu ON App.

1. Click the icon
2. Select upgrade type.
3. Follow the prompts to upgrade the firmware.

Upgrade type introductions:
- **Gimbal update**: Repair / update or newly add gimbal control / function / parameter and etc.
- **Keyboard update**: Repair / update or newly add button/touch screen/interaction functions, update more compatibility cameras which can be controlled through WIFI, repair few bugs about camera control through WIFI, and etc.
- **Bluetooth firmware update**: Repair / update or newly add Bluetooth functions, update more compatibility cameras, and etc.

Please read the following notices CAREFULLY:
1. Please KEEP your phone screen ON during upgrade progress.
2. Do NOT leave current App page.
3. The motors will be powered off during upgrade progress, this is normal case.
4. In case of upgrade failure, please reboot your gimbal and restart App on your phone, and then perform upgrade again until successful upgrade.
5. If upgrade success, please forget/unpaired the gimbal with your phone in phone settings page, and reconnect again.

**Start updating**
8. Gimbal Initialization

You can initialize your gimbal when:

1. When camera is not level
2. If not used for a long period of time
3. In case of extreme temperature variations

Adjusting Steps:

1. Display
   - Tap the function button for 5 consecutive times and hear the "beep" sound, and the motor will stop working and "Initing" shows up.

2. Display
   - Place the gimbal on the table unmoved, and the gimbal automatically detect whether or not it is placed on a static flat surface, and then its initializing will start automatically showing "Initing" on the display, and "Success" will be displayed after the initializing has been successfully completed.

3. Function Button
   - After the initialization is done, single tap the function button to wake up and return to the main interface.
   - Note: if the initialization is not successful for a long time, long press the function button to turn off the gimbal, restart it and then initialize.
